

WILLIAMS

METAL FABRICATIONS

Going above and beyond in metal fabrication.

Who We Are

Williams Metal Fabrications has worked in the metal fabrication industry since 1998. Long-standing clients include some of South Australia's largest defence, utility, mining, marine, civil and construction companies, and we've worked on many of the region's largest infrastructure projects.

Services & Solutions

- Metal fabrication
- Project management
- Installation and onsite welding
- Labour hire
- Commercial vessels and operator hire
- Crane truck and operator hire
- 3D site scanning and steel detailing
- Site maintenance
- Shed installation

We specialise in custom solutions. We love tricky projects. And we always over-deliver.

What we do for you

Solve Your Problems

We're hands-on with all of our clients, often coming up with design solutions to your most complex problems. Even other metal fabricators sometimes partner with us when they get stuck.

Give You Peace of Mind

We're certified with a fully Integrated Management System (including quality, environmental and safety management), Construction Category 3, and ISO 3834 Welding Management.

Cover Your Needs

We are one of only a few metal fabrication companies in SA offering design, fabrication and installation as well as contract services such as labour hire, boat hire and crane truck hire.

Machinery & Workshop

Our northern Adelaide workshop has a manufacturing area of 2,080m² and a large lay-down area. It includes a wide range of essential machinery:

- 10 tonne overhead crane
- 2 x 5 tonne overhead cranes
- 5.8 tonne crane truck
- 3.5 tonne and 2.5 tonne forklifts
- Mobile diesel welders and generators
- Thread cutting machine
- Bending machine
- Much more that enables bespoke fabrication

We can carry out on-site welding and repairs – both on land and on water – via our commercial work boats and certified operator. Our tough aluminium boat offers exceptional stability and load capacity, and can operate in extremely shallow water.

A 5.8 tonne crane truck, with certified operator, is also available for hire – especially beneficial when site access and unloading is difficult.

We stretch the boundaries of what can be achieved, no matter what a project or client requires.

Give You The Best

Our people are the best in the industry, including boilermakers, welders and riggers, many with elevated work platform licences, crane licences and boat licences. We invest in our people, so we can deliver outstanding services.

Make You Look Good

We know you're under pressure to deliver your project, and you need rapid and flexible support. Our workflow is organised to allow us to prioritise urgent jobs, while keeping all of our clients on track.
