

Williams Metal Fabrications has worked in the metal fabrication industry since 1998.

Long-standing clients include some of South Australia's largest mining, marine, defence, civil and construction companies, and we've worked on many of the region's largest infrastructure projects. Our comprehensive turn-key solutions include design, 3D site scanning and point cloud, steel detailing, fabrication and protective treatment all the way through to installation, onsite labour hire, maintenance, and even boat, crane and telehandler hire.

Services + Capabilities

- Our northern Adelaide workshop includes robotic welding, and has a manufacturing area of 2,380m² and a large lay-down area
- On-site welding and metal repairs, both on land and on water
- Bespoke metal fabrication for the maritime, infrastructure and defence industry sectors
- Erection and repair of existing infrastructure and plant
- Design, 3D site scanning and steel detailing
- Surface treatment
- Onsite labour hire, commercial vessel, crane and telehandler hire
- Project management and maintenance

Key Discriminators

- 100% Australian owned and operated, operating in SA, NT and WA
- Part of a comprehensive supply chain with export capabilities
- Design and installation services as well as labour, boat, crane and telehandler hire
- On-site welding, repairs, and maintenance are performed on land and water using our commercial work vessels (6.2m and 7.3m) with certified coxswains, along with mobile crane and telehandlers
- Design and fabrication of any metal structures and components required, including advanced robotic welding for the ultimate in welding precision
- Fully Integrated Management System, Construction Category 3 and one of only a handful of SA companies with ISO 3834-2 (currently undergoing DIN 2303 certification)
