WILLIAMS
METAL FABRICATIONS

End-to-End Fabrication Solutions for Marine, Defence & Infrastructure

Established in 1988, Williams Metal Fabrications has worked with some of South Australia's largest mining, marine, defence, civil and construction companies - contributing to major infrastructure projects across the state. We deliver end-to-end fabrication and installation services, from design, 3D scanning and detailing through to fabrication, surface treatment, installation and maintenance as well as boat, crane and telehandler hire.

Services + Capabilities

- Northern Adelaide workshop with robotic welding, 2,380m² manufacturing space and large lay-down area
- On-site welding and repairs (land and water)
- Bespoke metal fabrication for maritime, infrastructure and defence sectors
- Erection, repair and maintenance of infrastructure and plant
- Design, 3D site scanning and detailing
- Surface treatment
- Labour hire, commercial vessel, crane and telehandler hire
- Project management

Key Discriminators

- 100% Australian owned and operated, servicing SA, NT and WA
- Part of a broader supply chain with export capabilities
- In-house design, fabrication and installation plus equipment and labour hire
- On-site welding, repairs and maintenance (land and water) using commercial work vessels (6.2m & 7.3m) with certified coxswains, along with mobile cranage and telehandlers
- Advanced robotic welding for maximum precision
- Fully Integrated Management System, Construction Category 3, and one of few SA companies with ISO 3834-2, Lloyd's Register, and DNV certifications
